HALOT-MAGE

Go Big and 8K with Miniatures

10.3" Masking LCD | 8K High Resolution | Smart Air Purifier

Supersize 10.3" LCD

8K (29.7μm) Resolution

Orange "MageArch" Flip Lid

Smart Air Purifier

Z-axis Dual Linear Rails

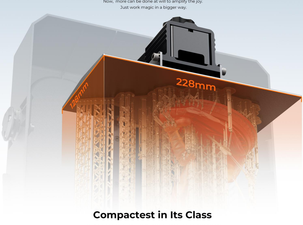
Self-developed Slicer HALOT BOX

Size-efficient Design

Optional Creality 8K High Precision Resin

Think Big with 10.3" LCD

HALOT-MAGE features a large LCD screen for a 228x128x230mm build volume, about 40% larger than an 8.9" printer.
Now, more can be done at will to amplify the joy.
Just work magic in a bigger way.



Compactest in Its Class

32% more size-efficient, HALOT-MAGE is the compactest among the mid-size resin printers with a similar build volume.
Leaving more room to do other cool stuff.

8K Magic for Exciting Details

HALOT-MAGE adopts an 8K mono LCD,
which brags 33,177,600 pixels and 29.7μm XY resolution,
a huge leap from the 50μm of regular 4K.
Hair, fabric, skin textures, and organic shapes
all come to life. Every print is a sight to behold.

Create an Envy of DIY Collection

Start to print your own figurines, miniatures, or cosplay props.
It is a chuckle and pride that
can not be replaced by buying from others.

Wow, "MageArch" Flip Lid

The flip lid of HALOT-MAGE is easy to open and close with one hand and needless to place aside.
It is only 1/4 taller when opened, saving more room.
The orange tint is practical to block 99.89% of ambient UV light for minimal interference.
Rigid lines with subtle chamfering, strike stylish, simple, and sleek.

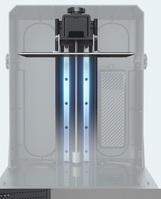
Air Purifier Really Saves the Day

Powered and controlled via the printer directly, it includes a replaceable activated carbon filter that is **5.8** times larger than others.
It absorbs intrant resin odor more efficiently.
A vent hole is at its back to connect a vent tube.

* The carbon filter lasts about 3 months after each replacement.

Ultra Steady Z-axis with Dual Linear Rails

The Z-axis of HALOT-MAGE features
dual rigid linear rails and
is driven up and down by a powerful motor.
It reduces wobbling vastly and
deals well with larger, heavier prints.



Wider Choice Better Slicing

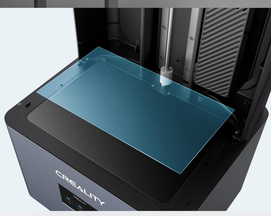
The self-developed HALOT BOX adopts
an intuitive 4-stage workflow
and includes many presets.
HALOT-MAGE is also compatible
with other slicer software.

HALOT BOX | CHITUBOX BOX

* With HALOT-MAGE, you will get a 3-month VIP of CHITUBOX Pro for free.

Glass LCD Protector Rest Assured

The LCD screen is covered
by tempered glass with a tight sealing.
It holds well against impacts,
scratches, and resin leaks.



Creality 8K High Precision Resin Option

High quality with low shrinkage and viscosity.
The water-washable formula produces less odor or skin irritation.
Offering bright and stunning colors.

* HALOT-MAGE prints better with Creality 8K High Precision resin.

Specifications

Printing Technology	LCD MSLA	Light Source	Integral Light
Build Volume	228x128x230mm (8712cm³)	Light Intensity	5000±10%μW/cm²
Product Dimensions	333x270x608mm	File Transfer	USB drive
Package Dimensions	420x350x575mm	Air Purifier	Yes
Net Weight	12kg	Input Power	100W
Gross Weight	15kg	Resin	405nm resins
Printing Speed	1-5s/layer	Slicing Software	HALOT BOX, CHITUBOX, LycheeSlicer
Layer Height	0.05-0.15mm	Computer OS	Windows/Mac
LCD Screen	10.3" monochrome screen	File Formats	STL/OBJ
LCD Resolution	8K (7680×4320)	Display Screen	4.3" color touchscreen
XY Resolution	29.7μm
